## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### ***Claim Objections***

2. Claim 1 is objected to because of the following informalities: line 3, "facilitating establishing" is unclear. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

a. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bowser. Since applicant has utilized Jepson format, and has implied admission of a self-administered device being known in the art, the preamble is treated as prior art. Thus, Bowser discloses a device having a semi-spherical (F) massaging device where a door frame (fig. 1) is used as a site for the massage, where the device is positioned in straddling relation to a vertically oriented rectangular strip disposed along a wall of the frame normally serving

as a stop for a pivotal traverse of a door mounted in the doorway (fig. 1) and instructing an individual to assume a position in the doorway in leaning engagement against the device (col. 2, lines 1-2) where body movements while maintaining engagement provides a self administered back massage (col. 2, lines 25-34).
